

KLEAR FLOC Tabex® TECHNICAL DATA SHEET

What is Klear Floc?

- ◆ highly concentrated swimming pool water flocculent
- ◆ may be used in any size or type of pool (above ground, or in-ground, vinyl, or concrete)
- ◆ effective with sand filters only
- ◆ used regularly, it will assure crystal clear water under all conditions
- ◆ does not affect the pH or water balance and is compatible with any type of chlorine, bromine, or salt chlorination system as well as other swimming pool chemicals

How does Klear Floc work?

- ◆ reduces the organic contamination of the water by binding fine, suspended particles, much too small for the filter to trap, making them larger groups of particles
- ◆ in the large groups, the particles are trapped in the filter and removed from the pool water
- ◆ used regularly, Klear Floc will actually reduce the amount of chlorine or algaecide you will need to keep your pool sparkling clear

Dosage Rates

For heavily contaminated pools:

- ◆ premix 200 mL per 10, 000 L of pool water in a pail of water and broadcast over the pool's surface
- ◆ wait 12 hours before vacuuming settled debris to waste

For cloudy water conditions:

- ◆ premix 30-50 mL per 10, 000 L of pool water in pail of water and add directly to the skimmer
- ◆ backwash the filter the next day

When can I use the pool?

- ◆ the pool is safe 15 minutes after treatment

When do I use it?

- ◆ should be used immediately after a heavy rainfall, before a pool party, after a shock treatment or whenever cloudy or turbid water conditions exist
