What is Ultra Pool Secure?

- ◆ a concentrated liquid pool conditioner designed to remove discoloration and stains from swimming pool waters and surfaces caused by such metals as iron, copper, and manganese will also remove unwanted calcium scale from pool equipment and increase filter and heater efficiency

How does Ultra Pool Secure work?

- ◆ reacts chemically with mineral deposits and dissolved metals by sequestering and holding them in solution
- ◆ also forms a microscopic film coating on interior surfaces and piping which is impenetrable to oxygen
- ◆ the film protects pipes and filter elements by reducing the problems caused by oxidation and metallic corrosion

Dosage Rates

- ◆ for stain removal, add 200 mL for every 10, 000 L of pool water directly to the pool water in the area of existing stains
- ◆ if stains persist, repeat dosage after one week
- ◆ to eliminate discolored water from dissolved metals, add a weekly dosage of 50 mL for every 10, 000 L of pool water

When can I use the Pool?

- ◆ the pool is safe 15 minutes after treatment

When do I use it?

- ◆ should be added every time unsightly stains due to metal deposits appear on pool surfaces, or when undissolved metals cause the pool water to discolor
- ◆ once stains or discolored water are eliminated, prevent future staining by using Tabex® Pool Secure
