Starting in 2020 we've had to make some changes to our product line since Tabex Chemicals ended their operation in late 2019. We have devoted many hours to finding high quality, commercial grade replacements for the discontinued Tabex line. Please see below for a summary of all changes. If there is any product not listed that you need, please contact our office to discuss an appropriate replacement.

We appreciate all of your patience and understanding through this transition!

Old Product (Tabex):	New Product:	Dosage:
