

GRIME-AWAY Tabex[®] TECHNICAL DATA SHEET

What is Grime-Away?

- ◆ a specially formulated solution designed to solve the unique cleaning problems in and around pools and spas
- ◆ safe, effective, non-abrasive cleanser that removes grease, grime, dirt and scale from most vinyl liners, tile, fiberglass, and concrete pools
- ◆ not recommended for use on porcelain, marble, terrazzo, or enamel surfaces or on bronze or metallic glazed tiles tubs, sinks, and certain grades of ceramic tiles may be etched by prolonged contact with Grime-Away

How does Grime-Away work?

- ◆ swimming pools and spas develop tough scale, caked-on oil and rust on their tile, fiberglass, acrylic and vinyl surfaces
- ◆ difficulty in cleaning these surfaces arise when such tough stains and dirt must be removed effectively, without the aid of abrasive cleansers; and in finding a liquid cleaner that will remain on the wall surface long enough to complete the job
- ◆ Grime-Away is a heavy liquid that adheres to most surfaces and readily softens and dissolves grease, grime, dirt, and scale

Dosage Rates

- ◆ apply directly to a non-abrasive applicator such as a sponge or cloth and wipe over area to be cleaned
- ◆ allow Grime-Away a few seconds to loosen oil and dirt, but do not allow product to dry
- ◆ scrub areas where heavy deposits of grime and dirt have accumulated
- ◆ rinse the area with large amounts of fresh or pool water

What do I do if grime, dirt, or scale don't come off?

- ◆ in extreme cases of excessive build-up prolonged scrubbing may be necessary
- ◆ rinse off product and repeat treatment with a fresh application built-up dirt and grime should loosen after second application
