

COX PIRO-FLOWGAGE ORIENTATIONS FOR HORIZONTAL FLOW INSTRUMENTS

On this sheet are shown the various orientations that the Cox Piro-Flowgage for Horizontal Pipe can have. These are critical for proper installation and use, as *the hole in the brass probe must face the flow.*

To better facilitate the ordering process, we have provided orientation designations for each of the pictures shown here.

When ordering the Horizontal Flowgage (Part Number CPMGH) please indicate an orientation number along with the pipe size.

IF NO ORIENTATION NUMBER IS REQUESTED, THE DEFAULT IS "A"
